stability**

Leading the way for sustainable and traceable jojoba oil by supporting our customers' needs with Fair for Life and Organic certified jojoba oil.

Nothing illustrates our commitment to natural and sustainable ingredients better than our investments in our jojoba activities in the USA and Argentina. A native crop from the Sonoran Desert, jojoba's history is tightly intertwined with Arizona's rich ethnobotany heritage. Vantage™ carries on this legacy with its renowned DW Jojoba oil range, and by leading the science behind jojoba and creating new opportunities to bring jojoba derivatives to beauty and personal care applications, From Farms to Formulations™.

Vantage offers **DW Jojoba Golden Organic FFL** and **DW Jojoba Colorless Organic FFL**, two organic grades of jojoba oil, made in the USA, and certified Fair for Life.

Certified organic based on USDA-NOP regulation

Recommended applications

All cosmetics

 **Vantage**

What is Fair for Life?

Fair for Life is a certification program for fair trade in agriculture, manufacturing and trade. The label encourages a supply chain business model that aims at the resilience of each link and enables the valorization and protection of exemplary supply chains, where stakeholders have chosen to act responsibly by implementing good economic, social and environmental practices. Fair for Life represents a growing community of more than 700 certified companies in 70+ countries around the world.

Fair for Life delivers concrete and direct outcome to brands focused on adopting a more sustainable business model:

Fair wages

Guarantee that producers and workers work for a fair wage and under good, respectful conditions, in a sustainable environment.

Transparency

Provide a framework by which fair trade projects can be monitored, in order to improve their impact over time.

Resiliency

Provide a framework by which companies can develop long term partnerships following fair trade principles.

Responsibility

Encourage organizations and companies to adopt a coherent and pragmatic approach to social and environmental progress and responsibility.

Traceability

Encourage organizations and companies to provide clear and transparent communication and to guarantee full physical traceability from the origin of production to the consumer.

Influential

Enable a large range of fair-trade products to be available to consumers; make them aware of their influence as responsible consumers, and positively influence their purchasing decisions.

Fair for Life theory of change

Manufacturers using Fair for Life certified ingredients contribute to lasting, positive change by incorporating ethical, fair and respectful partnerships in your supply-chains to the benefit of producers, workers and their environments.

Producers, workers and their families live in dignity and have strengthened capacity for resilience and gender equality.

Balanced governance power in supply-chains.

Improved local replication of environmentally sustainable practices.

Heightened communities' capacity-building to boost sustainable local developments.

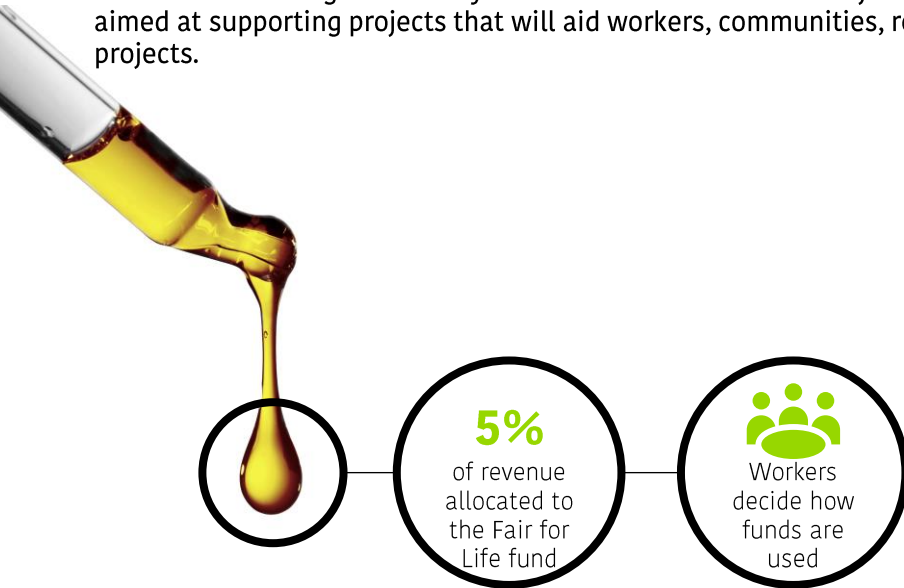

Increased supply-chain transparency and accountability.

Fair For Life supports local communities

5% of the revenue generated by the sale of FFL certified DW Jojoba Oil is allocated to a separate Development fund, aimed at supporting projects that will aid workers, communities, relevant organizations and/or environmental projects.

Employee Projects

These are projects that will benefit the employees, housing improvement projects, education funding, additional job-specific training, etc.

Community Projects

These are projects that will benefit the local community, such as improving emergency response resources in the area, donating to the local emergency response team, donating to the local schools, etc.

Organizational Projects

These are projects that will improve the longevity of the organization, like yield improvement projects, equipment upgrades, expansion projects, etc.

Environmental Projects

These are projects that will support the environmental commitment of the organization, such as water harvesting, solar-power shade structures, etc.

How DW Jojoba FFL empowers local workers

Workers are empowered and directly involved in the management of the Fair for Life fund, making sure the resources are used on projects relevant to their work conditions and communities.

El Nino Farm:
12 full time employees
15 seasonal employees

Tucson Oil extraction facilities:
10 full time employees

Vantage leads the science behind jojoba oil
